

www.mahaffayamps.com

(Actual size - almost.)

The **Little Lanilei 3350LT** has all the features of a big amp and practice amp built into one 8" x 8" x 7" package!

It can be used for gigging at a fraction of the cost and weight of a full-sized combo amp. What gigs can't be done with the little 6½" speaker can be done with an extra cabinet for sure. You can drive a 4' x 12' cabinet at stage volume.

And . . . with the 3350LT's unique master volume control, ANY volume level of tube overdrive can be used. Perfect for jamming late at night when everyone else in the house is asleep.
